Assurance feedback — changes made

For: Assurance team
Date: 24 September 2026
Covers: the Home page and the Product page (the screens in "Commissioner HealthStore Demo – Assurance feedback")

Product page examples use **Luscii**. Where myCOPD differs, this is noted. The same changes apply to all product pages.

Home page

1. What the NHS HealthStore addresses — introduction

Where	Home page, "What the NHS HealthStore addresses" section, paragraph under the heading
Feedback	We conduct a review of the evidence supplied by the vendor but this is to mitigate this risk for HealthStore, it is not 'national assurance'. Local assurance is required.
Before	It reduces the burden on local teams by doing nationally what would otherwise be repeated at every Integrated Care Board (ICB). Commissioners retain all commissioning, clinical safety and deployment accountability.
After	It reduces the burden on local teams by bringing supplier evidence, NICE recommendations and commercial support together in one place. Commissioners retain all commissioning, clinical safety, assurance and deployment accountability.

2. Assurance card

Where	Home page, "What the NHS HealthStore addresses" section, first card
Feedback	It is not 'national assurance'. HealthStore will provide a central assurance document repository to support and streamline the local assurance process. Could be: "We make assurance easier and faster by providing access to source documents in your workspace once verified for your local assurance purposes."
Before — title	Assurance and certification
Before — text	Each product is reviewed against clinical safety, information governance, interoperability and evidence standards — national assurance that underpins your local due diligence.
After — title	Assurance support
After — text	We centrally hold supplier assurance evidence — completed DTAC, accessibility audit, security certifications and more - which are reviewed and monitored for expiry. We make assurance easier and faster by providing access to source documents in your workspace once verified for your local assurance purposes.

3. How it works — compare step

Where	Home page, "How it works" section, compare step title
Feedback	This gives the impression we have assured these products – we have not. Suggest using 'Compare products'.
Before	Explore and compare assured products
After	Explore and compare products

4. Conditions and pathways — introduction

Where	Home page, "Conditions and pathways we currently support" section, paragraph under the heading
Feedback	Not highlighted directly. Changed because it uses the same "nationally assured" wording.
Before	Condition pathways with NICE Health Technology Guidance, nationally assured products and full local opportunity data.
After	Condition pathways with NICE Health Technology Guidance, verified supplier evidence and full local opportunity data.

5. "Check if your ICB is DTx delivery ready" card

Where	Home page, promo cards
Feedback	What will this look like? Can we add something here about that local assurance piece?
Before	Card titled "Check if your ICB is DTx delivery ready": Self-assessment themes for governance, workforce and data before scaling digital therapeutics.
After	Card removed from the home page.

Product page

6. Assurance and evidence — section introduction

Where	Product page, "Assurance and evidence" section, paragraph under the heading
Feedback	This states we 'certify', we are not certifying anything, we have no assurance position. Remove first 2 sentences.
Before	The NHS HealthStore has reviewed this product nationally. We certify our confidence in its assurance position based on supplier-provided documentation. Your local team retains responsibility for due diligence — we make that faster by providing access to source documents in your workspace once verified.
After	Your local team retains responsibility for due diligence — we make that faster by providing access to source documents in your workspace once verified.

7. "What our assurance pack saves you"

Where	Product page, "Assurance and evidence" section, first block
Feedback	It is not 'national assurance'. Replace with: "We make it faster by providing access to source documents in your workspace once verified for your local assurance purposes."
Before — heading	What our assurance pack saves you
Before — text	Luscii: The NHS HealthStore runs national assurance once and your local team reuses the passport instead of repeating supplier checks. myCOPD: The NHS HealthStore provides the assurance passport and local deployment safety templates — reducing duplicated local work.
After — heading	How we support your local assurance
After — text	We make it faster by providing access to source documents in your workspace once verified for your local assurance purposes. (All products.)

8. Regulatory position

Where	Product page, "Assurance and evidence" section, "Regulatory position" panel
Feedback	HIRA status: remove. myCOPD is a Class I medical device. Show: (1) NICE HTG link with current status and latest update date; (2) medical device classification with a link to the MHRA PARD record for that product; (3) DTAC status — simply whether the form is complete and evidence provided or not.
Before	Device classification: Medical device — Class IIa SaMD. HIRA status: NHS HealthStore Independent Regulatory Assurance pack complete. Market access: Documented UK market access with classification rationale on file. (myCOPD: "Medical device — documented classification on file"; HIRA status: "HIRA evidence pack under NHS HealthStore review"; Market access: "UK market access documented".)
After	**NICE recommendation:** NICE HTG736 (link to nice.org.uk/guidance/htg736), Last updated 3 February 2026. **Medical device classification:** Class IIa medical device, with a link to the product's MHRA PARD record. **DTAC status:** green tag "Complete", with "Evidence provided" underneath. A grey tag "Not complete" with "Evidence not provided" is shown when the form is not complete. (myCOPD: Class I medical device.) HIRA status and Market access removed.

9. Assurance pack — layout

Where	Product page, "Assurance and evidence" section, assurance pack list
Feedback	Consider a new layout using the DTAC form layout: Clinical Safety, Data Protection, Technical security, Interoperability criteria, Usability and accessibility, plus NICE recommendation and the completed DTAC form from the supplier.
Before	Five rows, each with a status tag (Available or Review due): Clinical safety; Clinical evidence; Information governance and data protection; Interoperability; Commercial readiness pack.
After	Seven rows in DTAC order, with no status column or tags: Clinical safety; Data protection; Technical security; Interoperability; Usability and accessibility; NICE recommendation; Completed DTAC form. Each row lists the evidence held (see changes 10 to 16).

10. Clinical safety row

Where	Product page, assurance pack, "Clinical safety" row
Feedback	Change "Medical device regulation" to "Medical Device Status" and move it under the clinical safety domain. Include the completed Pre-acquisition questionnaire (PAQ form). Include the hazard log, with version numbers for both.
Before	Clinical safety: DCB0129 on file; local deployment pack provided.
After	Clinical safety: DCB0129 clinical safety case on file; local DCB0160 template provided. Medical device status — Medical device — Class IIa SaMD (myCOPD: Class I SaMD). PAQ form — v1.0, January 2026. DCB0129 hazard log — v3.2, March 2026. DCB0160 local hazard log template — v1.4, March 2026.

11. Data protection row

Where	Product page, assurance pack, "Data protection" row
Feedback	Include evidence of Information Commissioner's registration (which has an expiry date).
Before	Information governance and data protection: DTAC complete and on file, DPA available, DPIA template available, ISO 27001
After	Data protection: DTAC data protection section complete; DPA and DPIA template available. ICO registration — ZA000000, expires 14 May 2027. Data processing agreement — available in workspace. DPIA template — available in workspace.

12. Technical security row (new)

Where	Product page, assurance pack, "Technical security" row
Feedback	We need a domain for 'Technical security' which includes Cyber Essentials certification (with expiry) and the External Penetration Test Summary Report (expiry showing within 12 months).
Before	No row. (ISO 27001 was listed under information governance.)
After	Technical security: Security certifications and penetration testing evidence held. Cyber Essentials — not confirmed in reviewed sources (myCOPD: held, expires 30 November 2026). Penetration test summary — completed 12 February 2026. ISO 27001 — certified (myCOPD: not confirmed in reviewed sources).

13. Interoperability row

Where	Product page, assurance pack, "Interoperability" panel
Feedback	Keep as part of the DTAC layout.
Before	FHIR integration available. EMIS integration available. NHS Notify supported. API integration available. Outcome data exportable for commissioner reporting. Confirm local EPR integration requirements with supplier.
After	Unchanged.

14. Usability and accessibility row (new)

Where	Product page, assurance pack, "Usability and accessibility" row
Feedback	We need a domain for 'Usability and accessibility' which should include user journeys and WCAG 2.2 AA compliance evidence (3rd party audit, or plan with timeline).
Before	No row.
After	Usability and accessibility: User journeys and accessibility evidence held. User journeys — provided by supplier. WCAG 2.2 AA third-party audit — completed 20 January 2026.

15. NICE recommendation row

Where	Product page, assurance pack, "NICE recommendation" row
Feedback	Change "Clinical evidence" to "NICE recommendation".
Before	Clinical evidence: NICE HTG736 EVA recommendations.
After	NICE recommendation: NICE HTG736 EVA recommendations.

16. Completed DTAC form row (new)

Where	Product page, assurance pack, "Completed DTAC form" row
Feedback	Include the completed DTAC form from the supplier, as this contains information needed for a local assurance process.
Before	No row. (DTAC was mentioned under information governance.)
After	Completed DTAC form: Completed DTAC form on file. DTAC version — v2.0, February 2026.

17. Commercial readiness row

Where	Product page, assurance pack, "Commercial readiness pack" row
Feedback	Suggest commercial readiness is reviewed by the commercial team.
Before	Commercial readiness pack: Includes PA23/software route note and price schedule.
After	Row removed from the assurance pack, pending commercial team review. The route note and price schedule are still in the "How to buy" section.

18. HealthStore status

Where	Product page, top right
Feedback	This suggests we have conducted a central assurance process – we will not. This should be removed.
Before	HealthStore status: NHS HealthStore assurance complete; buyer selection pack ready
After	Assurance claim removed. The wording is now "Buyer selection pack ready". This status panel is not shown on the current version of the product page.

19. How to buy — the NHS HealthStore's role in procurement

Where	Product page, "How to buy" section, blue panel "The NHS HealthStore's role in procurement"
Feedback	As above – we don't. Replace with: "We make assurance easier and faster by providing access to source documents in your workspace once verified for your local assurance purposes."
Before	The NHS HealthStore supports you through the purchase — from buyer pack and pricing to introductions and contract support. We handle the upfront assurance work so you can move faster.
After	The NHS HealthStore supports you through the purchase — from buyer pack and pricing to introductions and contract support. We make assurance easier and faster by providing access to source documents in your workspace once verified for your local assurance purposes.

Still to confirm

- The versions, dates and ICO number shown in the assurance pack (changes 10, 11, 12, 14 and 16) are **example values** used for the demo. They need to be replaced with the real values from each supplier.
- The DTAC status shows "Complete" for every product in the demo. myCOPD's held DTAC is over three years old, so Assurance should confirm whether "Complete" is right for it.
- Commercial readiness is waiting for the commercial team's review.
